

CIS 3760 – Software Engineering
Instructor: Prof. S. Scott
Individual Accountability Report (IAR) Template

Note. Refer to the Project Manual for detailed instructions for IAR submissions.

Individual Accountability Report (IAR) Template

The following questions **MUST** be included and answered completely for each submitted IAR.

IAR must be submitted one of the following file formats: text or PDF.

Q1. Student Name: Scott Weselan

Q2. Student ID: 1009518

Q3. Associated Team Deliverable: Sprint 4

Q4. Section#, Team #: 1, 1

Q5. What were the main technical or methodological concepts and/or skills that were required to complete this team deliverable? (bulleted list is preferred):

- Databases
- Google cloud servers
- Flask (python)
- Android API
- Teamwork - Scrum

Q6. What was your existing level of experience with these topics/skills before your team began working on this deliverable? (1-2 sentences):

This sprint I was tasked with creating endpoints for the server and prepping some of the documentation for the final demo. I have experience doing server related work and writing documentation.

Q7. Comment on your individual academic, methodological, or technical learning during this deliverable, and what additional learning may be needed to understand or be more competent with these topics in the future?

I contributed to the group by taking on a technical task that I knew I could do well, the back end. Rather than handing it off to someone less experienced. That being said I tried my best to keep up with the things being implemented in the client. As well I helped work on the documentation and planning for the final demo using writing skills.

Q8. What specific contributions did you make to this team deliverable? This should include technical or project management contributions.

I built 2 more endpoints and the corresponding database queries. I wrote several sections of the written deliverable and helped make sure the demo would go smoothly. As well as if my teammates had questions for me I (though uncommon), I was willing to answer them in a timely manner.

Q9. With whom did you collaborate for any of the above contributions (be specific)?

I collaborated with Nich for this sprint. We are both part of the back end system so we worked together to provide the endpoints that the client devs needed to be able to access.

Q10. Comment on how well you managed your time over the time period allocated in the Course timetable to this team deliverable (i.e. the time between the prior team deliverable to this team deliverable).

I feel that my time was well managed. Nich took charge of most of the server related items this sprint coupled with the fact that there was much less work in this sprint over all. Excluding a few people whose parts were bigger. That is why I shifted more toward working on the written portion.
