Note. Refer to the Project Manual for detailed instructions for IAR submissions.

Individual Accountability Report (IAR) Template
The following questions MUST be included and answered completely for each submitted IAR.

IAR must be submitted one of the following file formats: text or PDF.

Q1. Student Name: Scott Weselan

Q2. Student ID: 1009518

Q3. Associated Team Deliverable: Sprint 0

Q4. Section#, Team #: 1,1

Q5. What were the main technical or methodological concepts and/or skills that were required to complete this team deliverable? (bulleted list is preferred):

- Overview of Current System
- Overview of Proposed System
- System Design Models
- Analysis
- Design Recommendations
- Project Backlog Creation
- Team Member Contributions

Q6. What was your existing level of experience with these topics/skills before your team began working on this deliverable? (1-2 sentences):

I have done sprint planning at my summer job for an ERP system. During my job was instructed on how to write user stories as well as how to articulate design recommendations.

Q7. Comment on your individual academic, methodological, or technical learning during this deliverable, and what additional learning may be needed to understand or be more competent with these topics in the future?

I would like to understand how to better create UML diagrams. I will have to do some independent research on this topic as I was not assigned it during this sprint. If the opportunity presents itself in a later deliverable, I will ask for this task to be assigned to me.

Q8. What specific contributions did you make to this team deliverable? This should include technical or project management contributions.

As a group we decided that I would work on the design recommendations as well as the project backlog for this deliverable.

Q9. With whom did you collaborate for any of the above contributions (be specific)?

I ended up doing the backlog (user stories) with Shawn. I wrote the design recommendations by myself. A lot of the overview and the proposed system were referenced from my work on the first deliverable. I also helped edit in general.

Q10. Comment on how well you managed your time over the time period allocated in the Course timetable to this team deliverable (i.e. the time between the prior team deliverable to this team deliverable).

We had a few small meetings to check up on the work being done by other group members which resulted in good accountability and a timely finish to this deliverable. I decided that I would get my work done as early as possible to avoid the usual time crunch that I normally encounter.
